These total premiums, as compared with the year 1921, show an increase of \$1,719,691.28 and the total losses paid show an increase of \$627,646.68.

The annual report last year carried a schedule showing the fire insurance premiums received and the losses paid from the establishment of the department.

In commenting upon the fire loss ratio for the District of Columbia, it is shown that the 55 per cent loss ratio to premiums shown in the above schedule for the year 1922 is 20 per cent higher than for the previous year.

The schedule above shows the 21-year ratio of the District of Columbia to be $34\frac{1}{2}$ per cent, or $2\frac{4}{5}$ per cent more than the average for the 20-year ratio.

In addition to the above, the department participated in a conference examination of the Acacia Mutual Life Association, of Washington, D. C., formerly the Masonic Mutual Life Association, in which the States of Virginia, Wisconsin, Pennsylvania, Missouri, and Alabama, as well as the District of Columbia, were represented.

In accordance with the requirements of section 651 of the Code of Laws for the District of Columbia, this department reported to your honorable board in March last the financial condition of all insurance companies and associations licensed to transact business

in the District of Columbia as of December 31, 1922, by simply showing their assets, liabilities, and surplus.

The financial statements submitted by the companies have since been carefully audited and corrected and I now submit in statistical and detailed form a report of the financial status and business of said companies for the calendar year 1922.

It may be interesting to call attention to the great increase of insurance done in the District of Columbia within the past seven years. This may be shown by taking the figures from the report of the superintendent of insurance for the year 1915, and comparing them with the figures of this report, namely, for the year 1922.

Collected for license fees and taxes for the year:

Amount of insurance written in the District of Columbia for the year:

1922 (exclusive of casualty).....	2, 776, 912, 752. 37
1915 (exclusive of casualty).....	493, 919, 911. 38
Increase.....	2, 282, 992, 840. 99

In the year 1915 there were licensed in the District of Columbia 254 insurance companies and associations; in the year 1922 there were licensed in the District of Columbia 363, an increase of 109 companies and associations within the last seven years.

It might be of interest to you to know that during the year 1922, 37 companies availed themselves of the privileges of the marine

law, and up to date there have been 101 qualified under the marine law.

In my last report to your honorable body I called attention to the defects in the present insurance code of the District of Columbia and pointed out wherein it was out of harmony with the marine law passed in March, 1922. Since submitting that report to you the department prepared with the assistance of the best insurance experts, both from the companies as well as field men and also the advice of American legal experts, a code of law for insurance covering all classes of insurance for the District of Columbia excepting fraternal insurance. This was submitted to Congress on the 18th day of December and was recommended for passage by the Committee of the House and favorably reported by the Senate Committee in January, 1923. The bill would have passed but for the legislative congestion that occurred owing to the short session ending in March. The bill had the indorsement of the insurance commissioners of the United States generally, as well as the leading members of the American Bar Association. After the adjournment of Congress the department went over the bill very carefully, and the bill will be reintroduced at the coming session of Congress in better shape, and we believe that it will be a far better bill than the original bill introduced.

It is the opinion of the superintendent that the results obtained under that bill will be beneficial to the District of Columbia in many ways, because we believe that it will not only provide for strong regulations and supervision over all matters of insurance but at the same time it will provide ways and means for the development and growth of our local companies now operating in the District under charters furnished under various acts of Congress.

Since the last report of the superintendent the department has somewhat changed the method of licensing agents doing business in the District of Columbia, and in that matter the District of Columbia was just one step ahead of the majority of the States of the Union, but the plan which we have adopted in the form of a questionnaire was formerly approved in detail at the December, 1922, meeting of the insurance commissioners, and similar methods like we are using here in the District are being rapidly adopted in all of the States of the Union. The results that have been obtained have been very gratifying to the commissioners and to the heads of the agency force. Under this system the department has refused to grant some forty-odd licenses, and several have suspended business in the District of Columbia which have heretofore operated.

In addition to the above the department has established, with the cooperation and assistance of the industrial health and accident companies operating in the District and supported by them, a bureau of information, which though only just started has shown its benefits already. It has been indorsed and commented upon favorably; in fact, we can say that similar bureaus are about to be established in other sections of the country. The State of Pennsylvania has now several such bureaus ready to operate.

The superintendent desires to take this opportunity to urge again upon your honorable body the need of an actuary for this department. The work of the Department is growing and the necessity for such an actuary is needed more and more. There is hardly a department that is as large as this department but what has one or two actuaries.

In the completion of my first year as superintendent I desire to take this opportunity to call to the commissioners' attention that during that year the superintendent has had the full cooperation of the various employees of this department and that the work of reorganizing the department to meet the modern conditions of the insurance business has been, on their part, cheerfully carried out and their loyalty has been greatly appreciated.

In closing my report I can not urge enough upon your honorable body the need of a larger appropriation for the work of this department. The insurance department collected \$228,283.94 and the expenditures of the department were \$21,511.07. The allowance for the operation of the department is entirely too small, as we are not in a position to give to those who pay these taxes the service they should receive. It might be of interest to note that there is an insurance company operating in the District under the supervision of this department that pays far more in taxes than is allowed for the operation of this department and the tax receipts for the coming year of two of the District companies will be more than the amount allowed the department, so that you can see that we really feel as though the department is more than earning its way and should be entitled to a larger amount of money, because the salaries paid in this department are smaller than those paid in any other department of the country and more help is needed to properly conduct the business.

Respectfully submitted.

BURT A. MILLER,
Superintendent.
